Today's Speaker Introduction

Alessandro Maserati Artificial Intelligence Manager, Mathematician, graduated at Scuola Normale of Pisa, after a specialization in logic he switched to management consulting in Boston Consulting Group where, passing through various practices and industries, he developed a strong passion for solving problems within complex organizations. From 10 years in the IT World he achieved challenging goals leading large teams through complex and dynamic environments.

Giovanni Rausa Software Developer and Project Manager in Logol. Graduated in Computer Engineering in the University of Pavia, passionate about Science, Math and especially IT. He tries his hand at learning new AI concepts by discovering cutting-edge technologies. Seeks to study, analyze and practically apply solutions that can improve the digital transformation of small and large enterprises, with the goal of improving the efficiency, productivity and ease of use of IT tools.

Agenda

- 1. A frequent problem in the developer world**
- 2. Our solution**
- 3. How it works**
- 4. The framework**
- 5. Risk & Opportunities of AI Assistant**

Developers waste
millions of hours
reinventing the
wheel

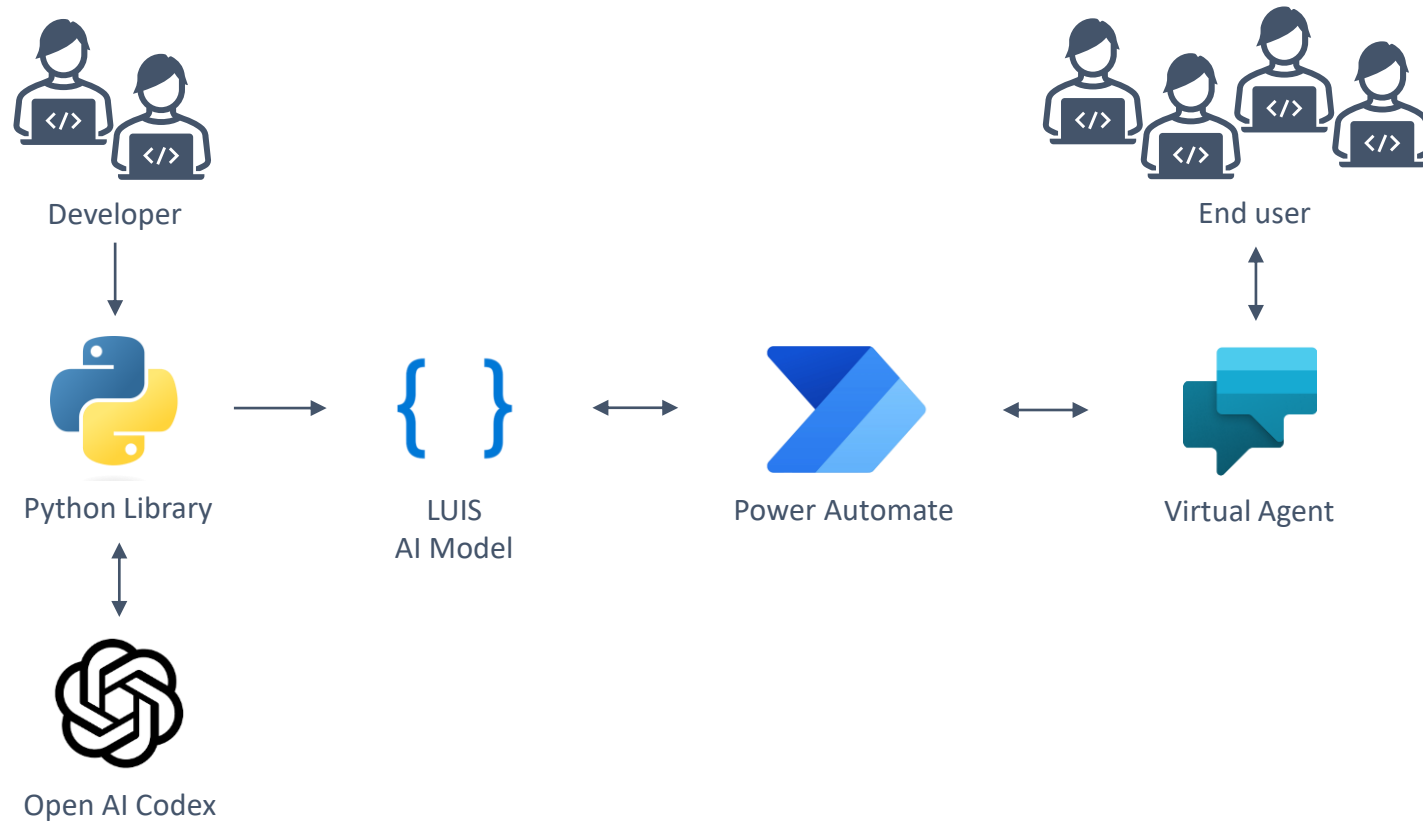

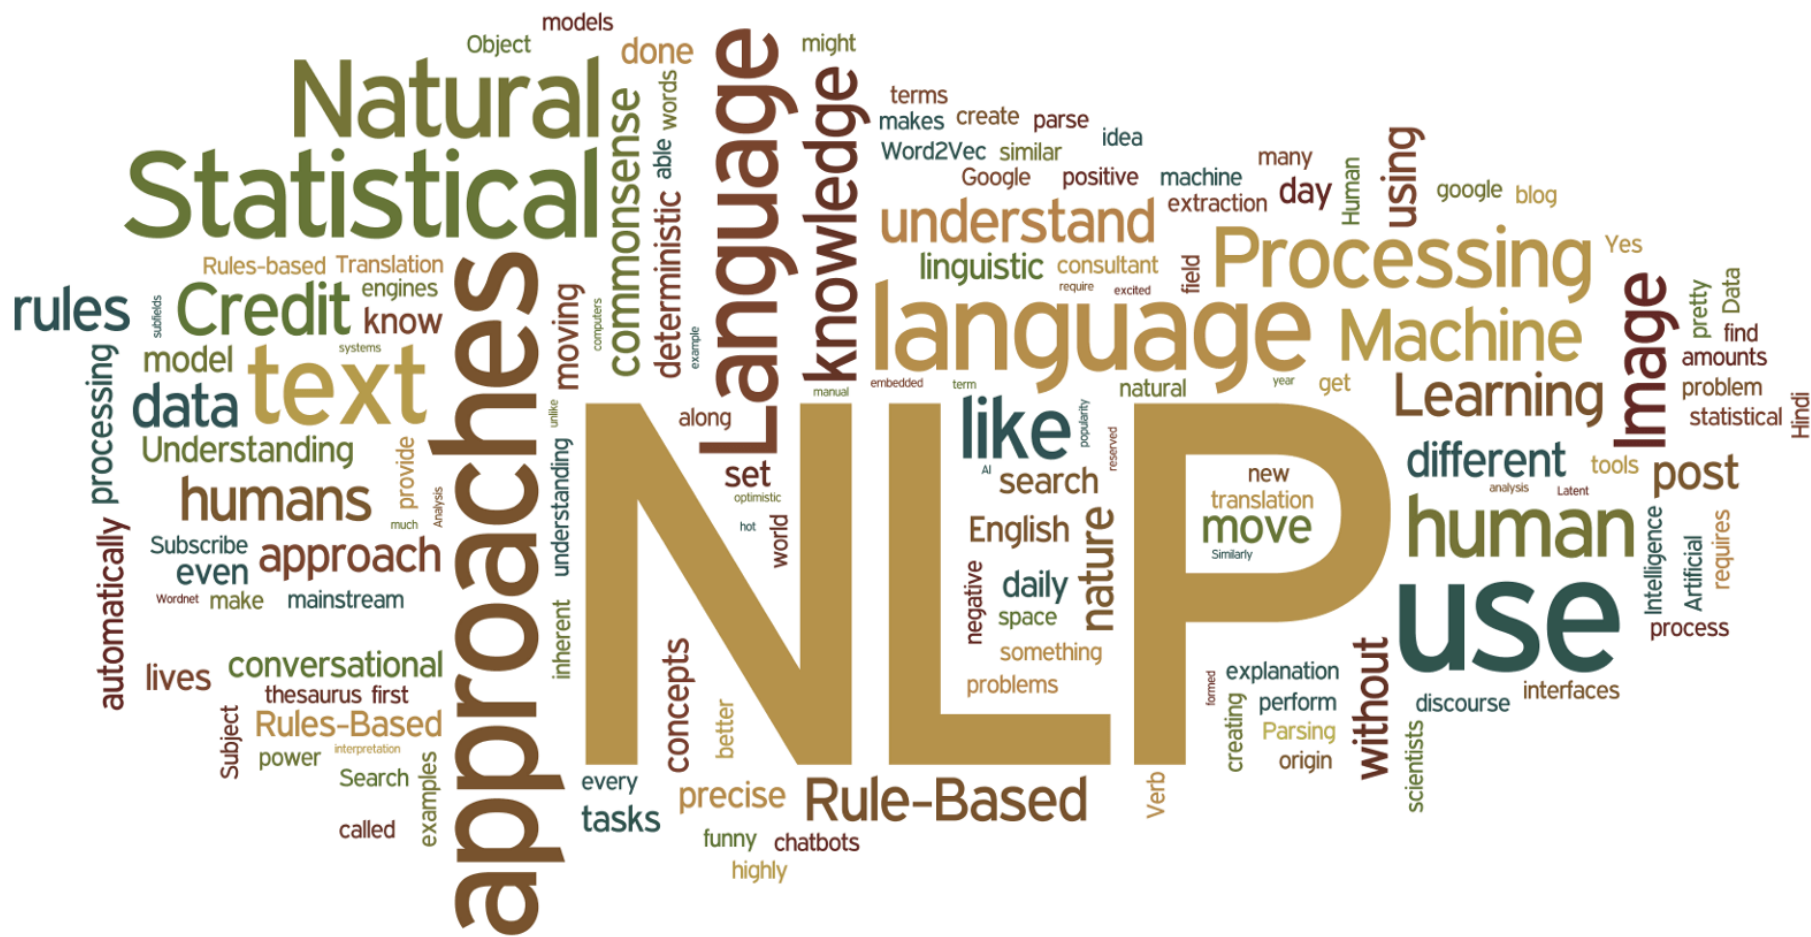

We have the solution!

Let's see how it works

A simple flow for a great goal

NLP can hide huge risks

Thanks for **Your Attention**
